

STEM Challenges on a Budget

STEM with the Standards

Check out STEM Challenges that can be used to support the standards in all subject areas. Take the challenge and modify it to meet your students' ability and enhance the standards with a hands-on engineering activity.

In this session you will learn to develop and manage a STEM lab for an elementary or middle school classroom. These STEM challenges are simple and can be used with items found at your local dollar store. You will see how to organize supplies and create STEM notebooks.

Please go to my website for files on each challenge. Under the More tab, there is a page dedicated to the 20 challenges we will be using during this session. I look forward to sharing my ideas with you. You do not need to print any copies. I will have everything you need on the day of the session. Get ready to design a Budget Bucket of STEM. Your students will love it! *Warning: Lots of fun and a little messy*
